

Introducing the  
Summer Stack  
... Exclusively at

MARLOW  
MED AESTHETICS

**Morpheus8 + CoolPeel = Beautiful Skin, No Matter The Season!**

The Ultimate Duo in Skin Rejuvenation has arrived and is available ONLY at MARLOW Med Aesthetics!!

We combine the latest RF Microneedling device on the market, Morpheus8, with the exclusive NO downtime Laser called the CoolPeel. Treatments exclusively distributed by InMode and Cartessa Aesthetics.

**The M8** combines microneedling with radio-frequency technology for fractional resurfacing that stimulates unsurpassed collagen production. Visible results can be seen as soon as 3 days post treatment. However, patients should expect the best results at 3 - 4 weeks after procedure.

**The CoolPeel** is an extension of the Tetra CO2 Laser system that leverages the exclusive H-Pulse. This high-peak-power short pulse delivers a fully ablative treatment without causing thermal damage to surrounding tissue. Drastically minimizing downtime while producing impressive superficial skin through resurfacing! Expect results 1 week post-procedure.

**What makes Combining M8 + CoolPeel So Powerful?** Combining these 2 technologies and treatments allows for the stimulation and production of healthy new cells and collagen on both the superficial and deepest layers of the skin. The adjustability of these treatments allows MARLOW to customize the laser and micro needling features for each patient's needs with MINIMAL DOWNTIME.

The result is **Beyond Impressive** facial contouring, skin tightening and skin resurfacing!
